INTRODUCTION

Welcome to the sixth weekly literature report from the Public Health England Behavioural Science Reference Cell. This report captures a range of COVID-19 related work in the field of Behavioural Science (mostly) released from the 6th June – 12th June 2020. We have cross-checked these lists with the Public Health England daily COVID-19 Literature Digest and Daily Alert Report and we are grateful to the work of those teams. The authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Please feel free to forward this email to your colleagues. If they would like to opt-in to receive this mailing directly, please contact us at the email address below.

If you have any feedback on this mailing, or content for inclusion in future reports, please email: WNCov.behaviour@phe.gov.uk

HIGHLIGHTS

As we know how time pressured everyone is at the moment, the authors of the digest have selected three recommended items from the lists below. This week these are:

1. [Face Masks Considerably Reduce COVID-19 Cases in Germany: A Synthetic Control Method Approach](#), IZA Institute of Labor Economics, June 2020.
2. [Estimating the effects of non-pharmaceutical interventions on COVID-19 in Europe](#), Seth Flaxman et al., Nature, 8th June 2020.
3. [Loneliness Is a Public Health Issue—COVID-19 Doesn't Have to Make It Worse](#), Johns Hopkins Bloomberg School of Public Health Podcast, 11th June 2020.

RESEARCH PAPERS

Pre-prints (not peer-reviewed)

[Too bored to bother? Boredom as a potential threat to the efficacy of pandemic containment measures](#), Corinna Martarelli et al., PsyArXiv Preprints, 11th June 2020.

[Predictors of Mental Health during the early Covid-19 Pandemic in the US: role of economic concerns, health worries and social distancing](#), Fabrice Kampfen et al., medRxiv, 8th June 2020.

[Adaptive and Dark Personality Traits in the Covid-19 Pandemic: Predicting Health-behavior Endorsement and the Appeal of Public-health Messages](#), Pavel Blagov, PsyArXiv Preprints, 5th June 2020.

[Trajectories of depression and anxiety during enforced isolation due to COVID-19: longitudinal analyses of 59,318 adults in the UK with and without diagnosed mental illness](#), Daisy Fancourt et al., medRxiv, 4th June 2020.

[The Relationship Between COVID-19 Infection and Risk Perception, Knowledge, Attitude As Well As Four Non-pharmaceutical Interventions \(NPIs\) During the Late Period Of The COVID-19 Epidemic In China — An Online Cross-sectional Survey of 8158 Adults](#), Hong Xu et al., medRxiv, 4th June 2020.

UNCLASSIFIED

Are adversities and worries during the COVID-19 pandemic related to sleep quality? Longitudinal analyses of 45,000 UK adults, Liam Wright et al., medRxiv, 4th June 2020.

Published

Using socioeconomics to counter health disparities arising from the covid-19 pandemic, Geoffrey Anderson et al., BMJ, 8th June 2020.

Eating Habits and Lifestyle Changes During COVID-19 Lockdown: An Italian Survey, Laura Di Renzo et al., Journal of Translational Medicine, 8th June 2020.

Estimating the effects of non-pharmaceutical interventions on COVID-19 in Europe, Seth Flaxman et al., Nature, 8th June 2020.

Which interventions work best in a pandemic?, Johannes Haushofer et al., Science, 5th June 2020.

Are we all in this together? Longitudinal assessment of cumulative adversities by socioeconomic position in the first 3 weeks of lockdown in the UK, Liam Wright et al., Journal of Epidemiology & Community Health, 5th June 2020.

The impact of the Covid-19 pandemic on domestic violence: The dark side of home isolation during quarantine, Matteo Antonia Sacco et al., Medico-Legal Journal, 5th June 2020.
